Data analysis and discussions on related problems:

NSS Volunteers collected all the data which was raised through their questions of the survey. The objective of the data analysis was compiled with all the findings and it was identified that the locus of their problems was specially directed to their health problems, economical problems, child marriage etc. They have lack of awareness about Govt. social project. They are also unaware about their opportunities professions and social life. Maximum no. of the local people engaged in agriculture. But they are still unaware of the effect of the chemical fertilizers and also unaware about the water conservations. They will face huge problems to collect drinking water in future. Child marriage and school dropout are a major problem in this area. This analysis and discussions led our volunteers to arrange another awareness campaign on general health and another campaign on social problems.

Day Six : 17.01.2020

Social Awareness Programme

The Sixth day of the camp organized a “Snake Bite Awareness Programme” on 17.01.2020 to create awareness of snake bite, first aid, safety and precautions measures. Snakebite, a major public health issue but a hugely neglected problem continues to affect millions of people with death and disability worldwide. In 2018. The programme began with a welcome speech by **Prof. Gobinda Tarafder**, Programming Officer, NSS Unit-1, GGDC, Kalna-1. After felicitation and a short introduction of Dr. Debabrata Mukherjee, Ex H.M, Katwa Bharati Bhavan High School. President , Katwa Vigyan Kendra, Paschim Banga Vigyan Mancha & President , Katwa Mahakuma Blood Donors Forum.

Dr. Debabrata Mukherjee is an Indian wildlife conservationist and a snake expert. He is known for his missions for saving snakes. Snake awareness programmes play a pivotal role in bringing down the rate of snakebite and mortality. Snake awareness becomes important in order to clear the myths that circulate about snakes; it also helps in understanding how snakes are important for the ecosystem. Moreover, it also helps us in gaining knowledge about the precautions that need to be taken when we encounter snakes. Snake awareness programmes also give us information on the primary measures that need to be taken at the time of snake bite. Deaths due to poisonous snake bite are common in rural part of India. Most people kill the snake after it bites someone. Often the patient is taken to hospital when it is too late to be saved. The programme was very beneficial and received positive feedback from our staffs and students.
